

CABINETS • CARTS

Dry Storage Cabinet

These cabinets may be placed in any warm area such as a kiln room or any small heated room for drying and storing greenware. The expanded metal screen around the cabinet permits the warm atmospheric air to dry the ware.

Doors may be padlocked to provide protection from unnecessary or unwanted handling which may damage or ruin the ware. You may wish to use the cabinet for those special bisque or glaze pieces which could be damaged by unnecessary handling.

The cabinet is fabricated from all welded steel and expanded metal thus assuring a stable, firm and rugged frame. Strong particleboard shelves are removable to accommodate various sizes from short too tall. Shelf racks are spaced every six inches.

The cabinets may be stacked in pairs. A minimum of two or more is recommended, particularly for any class situation. Cabinets are shipped complete. No assembly required except for placing shelves.

Specifications:

Outside dimensions 43"H x 43"W x 25³/₄"D

DSC-1 - dry storage cabinet \$1,015.00

Shelf size 24" x 36" x 3/4"

Shelf material AC Plywood

Shelf Package 5 each \$195.00

Shipping weight (approx.) 275 lbs.

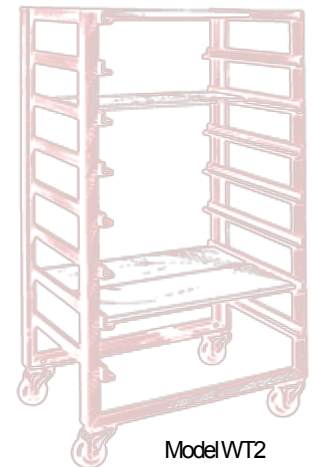

Shipping class 110

Minimum packing charge \$25.00 per cabinet No dealer discounts on shelf packages.

Glaze Spray Booth

Avoid unhealthy air contamination. The Alpine® spray booth draws excess spray down through a bottom blower to the rear of the unit. An opening is provided at the rear of the booth for connection to any outside vent. All excess spray is kept out of the glazing area and away from the operator. Wooden slats prevent chipping or contamination of ware. They are also removable for easy cleaning. Motor, blower and all moving parts are completely enclosed providing a safe and compact spraying area occupying a minimum of floor space. Do not use with flammable liquids.

Specifications:

Dimensions—spray area: 28" W x 22" D x 33" H

Dimensions—outside: 28" W x 22" D x 69" H

Power: 1/4 HP, 115V AC, 3.2 amps,
